Overview

Professional Food Dehydration Solution

This food dehydration machine is designed for efficient preservation and snack preparation, featuring a 6-layer tray system for high-capacity output. Equipped with a digital touch interface, it allows for precise control over drying times and temperatures, ensuring consistent results for fruits, herbs, meats, and yogurt. The integrated hot air circulation system promotes even drying, while the transparent door design lets you monitor the dehydration process without interrupting the cycle.

Technical Specifications

Power Consumption

500 W

Max Power

Voltage Range 100-240V, 50/60Hz

Temperature Range 104°F - 167°F

Design & Build

Tray Count 6 layers

Material Safety BPA Free

Features

Key Features

- Digital touch panel controls
- Transparent observation door
- Hot air circulation system
- Easy to clean design
