

Food Grade Rubber Roller for Machinery

This precision-engineered rubber roller is designed for use in food and beverage machinery. This durable roller ensures smooth and efficient material handling, contributing to optimal performance and longevity of your equipment.

Product Overview

High-Performance Food Grade Rubber Roller

Engineered for excellence in food processing environments, this rubber roller provides superior material handling for rice huller machinery. It features a design optimized for high wear-ability and consistent performance under demanding operational conditions. The construction utilizes advanced rubber compounds to ensure long-term equipment reliability and efficiency.

Technical Standards

Certifications	ISO 9001:2000
Origin	People's Republic of China

Performance Features

Applications

- Rice huller machinery
- Food and beverage processing
- Material handling systems

Key Benefits

High wear-ability • Food grade materials • Durable construction
