

Food Processor Agitator

This agitator is a component designed for food processors, blenders, and mixers. It features a transparent upper container and a black base, and it is suitable for processing wet ingredients.

Overview

Professional Food Processor Agitator

This high-performance agitator is designed specifically for integration with food grinders, mixers, and blenders. Featuring a durable construction with a transparent upper container and a robust black base, it is engineered to handle demanding kitchen tasks. The unit is optimized for processing wet ingredients, making it a versatile component for commercial or high-volume food preparation environments.

Technical Specifications

Application Type

Wet Processing

Compatible Equipment

- Food Grinders
- Mixers
- Blenders

Material

Durable Plastic

Design Features

Transparent Container, Wet Ingredient Optimized
