

Food Processor and Blender Combo

This versatile kitchen appliance combines a food processor and blender in one unit. It features a powerful motor, multiple speed settings, and various attachments for chopping, slicing, grating, blending, and juicing.

Product Overview

Versatile Kitchen Performance

The SG500 is a powerful, multifunctional kitchen appliance that seamlessly integrates a food processor and blender into a single, space-saving unit. Engineered for efficiency, it handles everything from chopping and grating to high-speed blending and citrus juicing. With its robust motor and durable, BPA-free components, this system provides consistent results for demanding food preparation tasks.
