

Food Waste Disposer for Kitchen Sinks

This food waste disposer is a kitchen appliance designed to shred food waste into small pieces that can be flushed down the drain. It efficiently grinds food scraps, reducing the amount of waste sent to landfills.

Product Overview

Efficient Kitchen Waste Management

This food waste disposer is designed to seamlessly integrate into standard kitchen sinks, providing an efficient solution for managing organic scraps. By grinding food waste into small particles, the unit helps reduce the volume of waste sent to landfills. It features a robust motor and integrated sound insulation to ensure reliable, quiet operation in a household environment.

Technical Specifications

Motor Power

0.65 HP
Horsepower

Intended Use

Household • Kitchen Sink

Key Features

- Sound insulation system for noise reduction
- Durable construction for long-lasting performance
- Easy installation under standard sinks
