

Foot Operated Air Pump with Gauge

This foot-operated air pump is a compact and portable solution for inflating tires, sports equipment, and other inflatable items. It features a durable steel frame, a non-slip foot pedal, and an integrated pressure gauge for accurate inflation.

Product Overview

Compact & Efficient Inflation Solution

This foot-operated air pump is a robust and portable solution designed for inflating tires, sports equipment, and various inflatable items. Featuring a durable steel frame and a non-slip foot pedal, it ensures stability and ease of use during operation. The integrated pressure gauge allows for precise inflation, helping users monitor pressure levels and avoid over-inflation, while the foldable design makes it convenient for storage and on-the-go use.
