

Foot-Operated Impulse Sealer for Thermoplastic Films

This foot-operated impulse sealer is designed for sealing various thermoplastic films. Its foot pedal allows hands-free operation, providing precise control and increased efficiency.

Product Overview

Foot-Operated Impulse Sealer

This foot-operated impulse sealer is a versatile packaging solution designed for sealing various types of thermoplastic films. By utilizing a foot pedal for hands-free operation, it allows for precise control and increased efficiency during the packaging process. The machine is built with a durable metal frame to ensure stability and reliable, long-term use in industrial and commercial environments.

Operational Features

Adjustable Settings

- Sealing time

Operation Method	Foot-operated
Sealing Mechanism	Impulse sealing

Construction & Design

Frame Material	Durable metal
----------------	---------------

Applications

Typical Uses

Bags • Pouches • Flexible packaging

Compatible Materials	Thermoplastic films
