

Foot Operated Sheet Metal Shears

These foot operated shears are designed for cutting sheet metal. They feature a robust frame with spring-assisted operation and a large worktable for material support and precise cutting alignment.

Product Overview

Heavy-Duty Foot-Operated Shears

These heavy-duty foot-operated shears are specifically engineered for efficient sheet metal cutting in industrial and fabrication environments. Featuring a robust frame and spring-assisted operation, the tool is designed to minimize operator fatigue while ensuring reliable performance. The large worktable surface provides essential support for materials, allowing for precise cutting alignment and consistent results.

Key Features

Operational Features

- Foot-operated mechanism for hands-free control
- Spring-assisted operation for ease of use
- Robust, heavy-duty frame construction
- Large worktable for material support

Application

Ideal Applications

Sheet Metal Cutting, Industrial Fabrication, Metalworking
