

Forage Chopper Machine

This hay cutter is a robust and efficient machine designed for processing various types of forage, including hay, straw, and green crops. It is equipped with sharp blades that ensure a clean and consistent chop, producing high-quality feed for livestock.

Product Overview

Robust Forage Processing Solution

This forage chopper machine is designed for high-efficiency processing of hay, straw, and green crops. Built with a sturdy frame and integrated wheels, it offers reliable performance and easy mobility for agricultural operations. The machine features a powerful engine and sharp, adjustable blades to ensure consistent feed quality for livestock.

Performance & Features

Safety Mechanisms

- Protective guards
- Emergency stop mechanism

Performance Highlights

1 High

Operational Stability

Key Features

Adjustable Cutting Length, High-Efficiency Feeding Chute, Stable Power Output, Mobile Design

Usage & Application

Compatible Materials

Hay • Straw • Green Crops
