Product Overview

High-Efficiency Forage Processing

The 9Z-1.0 chaff cutter is a robust agricultural machine engineered for efficient processing of green and dry fodder, including grass, straw, and various crop stalks. Designed for reliability in demanding environments, this unit features a sturdy frame and a high-capacity cutting mechanism suitable for livestock feeding and composting applications. Its versatile design allows for operation with either an electric motor or a gasoline engine, ensuring flexibility for different farm setups.

Performance Metrics

Hourly Capacity

1 t/h

Minimum Capacity

1.5 t/h

Maximum Capacity

Technical Specifications

Motor Power	2.2 kw
Blade Count	4
HS Code	843610

Dimensions & Logistics

Machine Dimensions	1100 x 460 x 740 mm
Package Dimensions	620 x 520 x 380 mm

Features

Key Features

- Adjustable cutting length settings
- Integrated feeding chute
- Wheeled mobility system
- Durable heavy-duty frame

Compatible Power Sources

Electric Motor, Gasoline Engine
