

Forged Billet Crankshaft Connecting Rod

This is a forged billet connecting rod designed for crankshaft applications. It provides a strong and reliable link within the engine's rotating assembly.

Product Overview

High-Performance Forged Connecting Rods

This forged billet crankshaft connecting rod is engineered for durability and precision in high-stress industrial applications. Utilizing advanced forging technology, the component offers superior structural integrity compared to standard machined parts. It is compatible with a wide range of materials, including carbon steel, stainless steel, and high-temperature alloys, ensuring versatility for demanding mechanical systems.

Manufacturing Capabilities

Machining Size Range

Dimension Type	Size
Maximum Size	∣ 1200mm × 6000mm
Minimum Size	∣ 100mm × 20mm

Compatible Materials

Carbon Steel, Stainless Steel, High-speed Steel, Die Steel, High-temperature Alloy Steel, Copper, Aluminum, Low-carbon Alloy

Production Capacity

Annual Production Capacity

7000 tons

Annual Capacity

Quality Standards

Certifications

GB16949

Product Applications
