

Forged Pipe Flange

Forged pipe flanges are essential components in piping systems. They provide secure and leak-proof connections between pipes, valves, pumps, and other equipment.

Product Overview

Industrial Forged Flanges

These forged flanges serve as critical components in industrial piping systems, designed to facilitate secure and leak-proof connections between pipes, valves, pumps, and other essential equipment. Precision-engineered for reliability, they are available in multiple configurations including weld neck, slip-on, blind, and threaded designs. They are constructed from durable materials such as carbon steel, stainless steel, and alloy steel to meet rigorous industry standards.

Technical Specifications

Available Designs	Weld Neck, Slip-on, Blind, Threaded
Material Composition	Carbon Steel, Stainless Steel, Alloy Steel

Applications

Primary Industries

- Oil and Gas
- Chemical Processing
- Water Treatment
- Power Generation
