

Forged Steel Axe Head for Wood Splitting

This axe head is made from forged steel and designed for splitting wood. It features a hardened cutting edge for durability and is painted red for rust prevention.

Product Overview

Professional Wood Splitting Axe Head

This forged steel axe head is engineered for heavy-duty wood splitting and forestry applications. Featuring a hardened cutting edge with a hardness rating of HRC 47-53, it ensures long-lasting durability and efficient performance. The blade is fully ground and fine-polished to maintain a sharp, effective edge for demanding tasks.
