

Forged Steel Check Valve, 1/2"-2", 150-1500 lb

This forged steel check valve prevents backflow in high-pressure environments. It is designed for unidirectional flow of fluids and is suitable for industrial applications.

Product Overview

High-Performance Forged Steel Check Valve

This forged steel check valve is engineered for demanding industrial applications requiring unidirectional flow control and backflow prevention. Built to withstand high-pressure environments, it is suitable for critical infrastructure in sectors such as oil and gas, chemical processing, and power generation. Its durable forged construction ensures long-term reliability and resistance to corrosive conditions.

Technical Specifications

Size Range	1/2" - 2"
Pressure Class	150 lb, 1500 lb
Material	Forged Steel
Standard	GB Standard

Key Features

Performance Highlights

150 lb

Min Pressure Class

1500 lb

Max Pressure Class
