

Forged Steel Cutter and Tongs Set

Forged steel cutter and tongs are designed for various metalworking and shaping applications. The tool features durable construction and ergonomic design for comfortable handling and precise control.

Product Overview

Professional Forged Steel Tool Set

This forged steel cutter and tongs set is engineered for demanding metalworking and shaping tasks. Its durable construction ensures long-term reliability in industrial environments, while the ergonomic design facilitates precise control during operation. Perfect for cutting, bending, and shaping metal components, this set is an essential addition for machine-tool and general fabrication applications.

Technical Specifications

Design Features

- Durable forged construction
- Ergonomic handling
- High precision control

Material	Forged Steel
Application Areas	Metalworking, Shaping, Cutting, Bending, Machine-tool applications
