

Forged Steel Engine Piston for QSL9 Engines

This forged steel engine piston is designed for Cummins QSL9 engines. It is engineered for durability and reliable performance in heavy-duty applications such as construction machinery and excavators.

Product Overview

High-Performance Engine Piston

This forged steel engine piston is engineered specifically for QSL9 engines, offering exceptional durability and reliability in demanding operational environments. Precision-machined to ensure an optimal fit, it is designed to withstand high stress, making it an ideal choice for heavy-duty construction machinery and excavators. By meeting or exceeding rigorous performance standards, this component ensures efficient engine operation and extended service life.

Technical Specifications

Material

Forged Steel

Part Number

4941393

Engine Compatibility

QSL9

Application

Key Features

- Enhanced strength
- High heat resistance
- Precision-machined dimensions
- Direct OEM replacement

Primary Applications

Construction Machinery, Excavators, Heavy-Duty Equipment
