

Forged Steel Eye Hook

Forged eye hooks are designed for lifting applications. They feature durable construction for reliable performance in various industrial and construction settings.

Product Overview

Forged Steel Eye Hook

This forged steel eye hook is engineered specifically for demanding lifting applications in industrial and construction environments. Its robust construction ensures reliable performance under load, providing a secure connection point for rigging and material handling tasks. Available in both self-colored and zinc-plated finishes, this hook offers flexibility to meet specific corrosion resistance requirements for your operational needs.

Technical Specifications

Primary Applications

- Lifting operations
- Rigging
- Material handling
- Industrial construction

Corrosion Resistance

Zinc-plated option available

Material	Forged Steel
Finishes	Self-colored, Zinc-plated
