

Forged Steel Mattock with Horizontal and Vertical Blades

This forged steel mattock head features horizontal and vertical blades. It is designed for digging, chopping, and cultivating soil in gardening and landscaping.

Product Overview

Professional Grade Mattock

This forged steel mattock is engineered for heavy-duty digging, chopping, and soil cultivation in professional gardening and landscaping environments. Featuring a dual-blade design with both horizontal and vertical edges, it offers versatility for breaking up hard ground and clearing roots. The robust steel construction ensures long-term durability, while the precision-sharpened blades provide efficient penetration for demanding tasks.
