

Forged Steel Pick Head with Pointed and Chisel Ends

This forged steel pick head features dual ends: one pointed for breaking and one chisel-edged for prying. It is ideal for gardening, landscaping, and construction tasks requiring both precision and force.

Product Overview

Versatile Professional Tooling

This forged steel pick head is designed for high-impact performance in gardening, landscaping, and construction environments. Featuring a dual-end design with a pointed tip for breaking ground and a chisel edge for effective prying, it provides the versatility required for demanding tasks. Its durable construction ensures longevity, making it a reliable solution for professional-grade excavation and demolition work.

Technical Specifications

Model Number	P404
