

Forged Steel Pick Head

Forged steel pick heads are designed for heavy-duty applications. These robust tools are ideal for breaking up hard surfaces, digging, and demolition work.

Product Overview

Industrial Forged Steel Pick Heads

These professional-grade forged steel pick heads are engineered for rigorous heavy-duty applications, including demolition, digging, and breaking up stubborn surfaces. Designed for longevity and reliability in the field, these tools offer a robust construction that stands up to consistent wear. They are fully compatible with standard pickaxe handles, ensuring seamless integration into your existing inventory of tools.

Specifications
