

# Forged Steel Pipe Coupling

This forged steel pipe coupling is made from carbon steel, alloy steel, or stainless steel. It is suitable for applications in petroleum, chemical, machinery, electric power, and shipbuilding industries.

## ADDITIONAL IMAGES

## Overview

### Industrial Forged Steel Pipe Couplings

These high-strength forged couplings are engineered for demanding industrial environments, offering exceptional durability and reliable performance. Designed to withstand extreme pressures and temperatures, they are suitable for critical applications including petroleum, chemical processing, shipbuilding, and heavy machinery. With a wide range of size and material options, these fittings ensure secure, long-lasting connections in complex piping systems.

## Technical Specifications

### Available Fitting Shapes

- Elbow
- Tee
- Union
- Cross
- Coupling
- Cap
- Bush
- Plug
- Swage Nipple
- Welding Boss
- Hexagon Nipple
- Weldolets
- Sockolets
- Thredolets

<b>Material Options</b>	Carbon Steel, Alloy Steel, Stainless Steel
<b>Size Range</b>	1/2" - 60" (DN15 - DN2000)
<b>Pressure Class</b>	1500-2500LB, PN100-PN250, 10K-40K

## Standards & Compliance

### Design & Manufacturing Standards

- ASME B16.5
- API 605
- MSS SP-44
- API 6A
- JIS B2220
- DIN 2527-2576
- UNI 2229
- UNI 2253
- UNI 6100-67
- AS4087

## Application

### Suitable Industries

Petroleum • Chemical • Machinery • Electric Power • Shipbuilding • Construction
