

Forged Steel Spading Fork with Wooden Handle

This spading fork features forged steel tines for efficient digging and turning of soil. It also features a durable wooden handle for a comfortable grip and long-lasting performance.

Product Overview

Professional Grade Spading Fork

This rolling forged spading fork is engineered for high-performance gardening and farming applications. Constructed from high-quality railway steel, the head ensures exceptional durability for breaking up compacted soil and aerating beds. Paired with a sturdy A-grade hardwood handle, this tool combines strength with user comfort for long-lasting performance.
