

Forged Steel Tine Pitchfork

This forged pitchfork features a multi-tine head made from hardened steel, ensuring durability and long-lasting performance. The tines are precisely spaced and angled for optimal material penetration and minimal spillage.

Product Overview

Professional Grade Forged Pitchfork

This heavy-duty pitchfork is engineered for agricultural and landscaping professionals who require reliability and durability. Featuring a robust five-tine head forged from railway steel and finished with a protective powder coating, it is built to resist rust and withstand rigorous daily use. The handle is crafted from high-quality Chinese toon wood, ensuring a secure and comfortable grip for efficient material handling.
