

Forging Brass and Aluminum Valves with Lawn Nozzle

This assortment includes forging brass and aluminum pipe valves and a lawn nozzle. Models include angle valves, ball valves, gate valves, and stop valves.

Product Overview

Professional Forged Valves and Irrigation Solutions

This premium collection of forged brass and aluminum valves is designed for high-performance fluid control across diverse industrial and residential applications. The series features specialized sealing technology, including double-hermetic designs, ensuring superior leak prevention and operational reliability. From robust gate and stop valves to specialized lawn nozzles, these components provide professional-grade durability for plumbing and ventilation systems.

Technical Details

Available Models

| Model | Type/Description |
|---------|--|
| HL-8217 | Forging brass angle valve |
| HL-8218 | Forging brass angle valve |
| HL-8219 | Aluminum plastic pipe ball valve |
| HL-8220 | Double hermetic ball valve |
| HL-8221 | Within whorl ball valve |
| HL-8222 | Forging brass gate valve |
| HL-8223 | Forging brass stop valve |
| HL-8224 | Papilionaceous Aluminum plastic pipe valve |
| HL-8225 | Lawn nozzle |

Materials

Forging Brass, Aluminum

Key Features

Sealing Technology

Double Hermetic Seal • Leak-Resistant
