

Forklift and Construction Machinery Seat

This seat is designed for forklifts and other heavy equipment, providing support and reducing operator fatigue. It features a robust suspension system to absorb shocks and vibrations, adjustable armrests, and a durable, weather-resistant covering.

Overview

Ergonomic Operator Seating

This construction machinery seat is engineered for durability and operator comfort in demanding work environments. Designed specifically for forklifts and heavy equipment, it features a robust suspension system to effectively absorb shocks and vibrations. With adjustable settings and ergonomic support, this seat helps reduce operator fatigue during long shifts.

Key Features

Comfort & Adjustability

- Integrated suspension system
- Adjustable backrest
- Adjustable headrest
- Heated seat functionality

Design Highlights

Ergonomic Design, Heavy-Duty Construction, Weather-Resistant, Shock Absorption

Compatibility

Suitable Machinery

Forklifts • Construction Machinery • Heavy Equipment
