Overview

Heavy-Duty Forklift Forks

These industrial-grade forklift forks are engineered for reliability and performance in demanding environments like warehouses, construction sites, and manufacturing facilities. Constructed from high-strength steel with a reinforced heel and tip, they provide exceptional durability and wear resistance for heavy load handling. The robust L-shaped design ensures optimal load distribution, while the protective finish helps prevent corrosion and extends service life.

Technical Specifications

Load Capacity Range

1.5 ton

Minimum Capacity

42 ton

Maximum Capacity

Length Range

1200mm - 2400mm

Fork Class

Class I - V

Compatibility

Attachment Types

- Pin type
- Blank
- Standard hook

Compatible Machinery

Forklift, Engineer Truck, Excavator
