

Forstner Bit Set for Woodworking

This Forstner bit set is designed for creating clean, flat-bottomed holes in wood. It includes various bit sizes, each featuring a precision-ground cutting edge for smooth and accurate drilling.

Overview

Professional Forstner Bit Set

This comprehensive Forstner bit set is engineered for woodworkers who demand precision and clean results. Designed to create accurate, flat-bottomed holes with minimal splintering, these bits feature precision-ground cutting edges for superior performance. Crafted from high-speed steel, they offer excellent durability and longevity for demanding projects, all organized in a protective wooden case.

Technical Specifications

Hole Profile

Flat-bottomed • Clean-cut

Material

High-Speed Steel (HSS)

Primary Application

Woodworking

Features

Key Features

- Precision-ground cutting edges
- Minimal splintering design
- High-speed steel construction
- Includes fitted wooden storage case
