Overview

Intelligent Multi-Channel Charging

This versatile battery charger is designed for efficient and safe charging of various battery types, including Li-ion, Ni-MH, and Ni-Cd. Featuring four independent charging channels, it allows for the simultaneous charging of multiple batteries with real-time monitoring via an integrated LCD display. The compact design, powered by a Micro USB port, ensures maximum portability for professional and personal use.

Technical Specifications

Selectable Charging Currents

- 0.5A
- 1.0A

Safety Protections

Overcharge Protection • Short Circuit Protection • Overheat Protection

Independent Channels
