

Four-Column Hydraulic Press for Ceiling Forming

This four-column hydraulic press is specifically designed for rapid ceiling panel forming. It features high speed, efficiency, and stable performance, with low energy consumption and noise.

Overview

High-Efficiency Ceiling Forming Solution

This four-column hydraulic press is specifically engineered for the ceiling industry, offering a blend of high-speed operation and stable performance. Designed with a compact structure, it minimizes noise and energy consumption while ensuring precise metal forming. Its robust build and responsive controls make it an ideal choice for high-volume, professional ceiling production environments.

Key Features

Performance Highlights

High Speed, High Efficiency, Low Noise, Low Energy Consumption, Compact Design

Technical Specifications

Model Specifications

Model	Force (KN)	Motor (KW)	Table Area (mm)
ZWY-40A	400	5.5	600*600
ZWY-40B	400	5.5	770*700
ZWY-40C	400	5.5	900*600
ZWY-60	600	7.5	900*900
ZWY-75	750	7.5	700*600
ZWY-90	900	11	900*900

Operating Speeds

250 mm/s

Fast Run

230 mm/s

Return Speed

Maximum Pressure

20 Mpa

Maximum Stroke

300 mm
