

Four-Conductor Telephone Cord

This cord is used for wiring indoor and outdoor telephone and doorbell intercom systems. It features four copper conductors, a PVC sheath, and PP insulation.

Product Overview

Reliable Four-Conductor Telephone Cord

This four-conductor telephone cord is engineered for consistent and reliable signal transmission in communication systems. Featuring high-quality plain copper conductors and durable insulation, it is built to withstand standard operational environments. The robust PVC sheath provides necessary protection, ensuring longevity and performance for your telephone wiring needs.

Technical Specifications

Conductor Material	Plain copper wire
Conductor Count	4
Insulation Material	Polypropylene (PP)
Sheath Material	Polyvinyl Chloride (PVC)
Maximum Operating Temperature	70 °C
Construction Features	Single plain copper wire, PP Insulation, PVC Sheath
