

Four-Core Telephone Line

This is a four-core telephone line suitable for engineering and digital phone line applications. It features high conductivity and durable insulation ensuring reliable communication.

Product Overview

Professional Engineering Cable

This high-purity four-core telephone line is engineered for reliable digital communication applications. Designed with high-conductivity materials and durable insulation, it ensures consistent signal transmission in demanding environments. With a 100-meter length, it provides ample coverage for professional engineering installations and infrastructure projects.

Technical Specifications

Core Count	4
Cable Length	100 m
Primary Application	Engineering, Digital Phone Lines

Key Features

Performance Highlights

4 cores Core Configuration	100 m Total Length
--------------------------------------	------------------------------

Material Benefits

- High-purity conductive material
- Durable insulation layer
- Engineered for signal reliability
