

Four-Cylinder Diesel Engine with Direct Injection

This four-cylinder engine features a direct injection system for efficient combustion and optimal fuel economy. Its compact design allows for easy integration into existing machinery and is suitable for use in generators, water pumps, and other heavy-duty equipment.

Overview

Robust Industrial Power

The LN498 is a robust and reliable four-cylinder diesel engine engineered for diverse industrial applications. Featuring a direct injection system, it ensures efficient combustion and optimal fuel economy. Its compact design facilitates easy integration into machinery like generators and water pumps, while the durable construction ensures long-lasting performance.

Engine Specifications

| | |
|----------------------|---|
| Cylinders | 4 |
| Fuel System | Direct Injection |
| Typical Applications | Generators, Water Pumps, Heavy-duty Equipment |

Turbocharger System

| | |
|--------------------|--------------|
| Turbocharger Model | M24 A/R42 |
| Cooling System | Water-cooled |
| Boost Regulation | Yes |

Components

Key Components

- High-pressure fuel pump
- Precision injectors
- Durable cylinder head
- Cooling fan
- Comprehensive filtration system
