Product Overview

Professional Commercial Refrigeration

This four-door commercial refrigerator is engineered for high-performance food service environments. Featuring a robust stainless steel finish and an integrated digital controller, it offers reliable cooling solutions for restaurants and hotels. The unit utilizes inner copper pipe coils and full-cabinet foaming to ensure energy efficiency and consistent temperature management.

Key Features

Operational Highlights

Dual Function, Digital Temperature Control, Auto Reset Door, Full Foaming Insulation, Stainless Steel Construction

Technical Specifications

Component Details

Component	Description
Cooling Coil	Inner Copper Pipe Coil
Door Mechanism	Auto Reset Door
Insulation	Full Foaming Cabinet
Controller	Dual Digital Display

Configuration

Freezer Option • Chiller Option • Dual Function Option
