

Four-Door Frost-Free Refrigerator with LED Lighting

This refrigerator features a red grosgrain toughened glass panel and LED cold light source lighting. It also offers a rotary ice-making box and a refrigerating chamber that is independently closed and frost-free.

Overview

Premium Four-Door Cooling Solution

This four-door frost-free refrigerator combines advanced cooling technology with a sophisticated design. Featuring intelligent computer temperature control and efficient cooling circulation, it ensures optimal preservation for various food items. The unit is designed for energy efficiency, meeting grade one standards while providing ample storage capacity for professional or high-end residential needs.
