Overview

Advanced Multi-Door Preservation System

This modern four-door refrigerator is engineered for professional-grade food preservation and organizational efficiency. Featuring a sophisticated multi-door configuration, it minimizes cold air loss while maximizing storage capacity for diverse food types. With integrated smart technologies like 'Cloud & Humidity' control and 'Smart Vary' temperature management, this appliance ensures optimal freshness for everything from fresh produce to frozen goods.

Design & Configuration

Door Configuration	Four-Door Cross Door
Key Storage Features	Adjustable Shelves, Transparent Drawers, Egg Box, Grain Storage, Cooked Food Compartment

Smart Technology

Integrated Technologies

M-fresh • Cloud & Humidity Control • Smart Vary • Hibernation Fresh

Specialized Storage Zones

- Transit Box (Wide-range temperature)
- Freeze Box (Rapid freezing)
- Fresh Box (Fruit drainage)
- Cooked Food Zone
