

Four-Head Seamless PVC Window Welding Machine

This four-head seamless welding machine is a specialized equipment for welding PVC profile windows and doors. It welds four corners simultaneously, creating a seamless and aesthetically pleasing finish.

Product Overview

Professional PVC Window Fabrication

The Four-Head Seamless PVC Window Welding Machine is a high-performance solution for the simultaneous welding of four corners in PVC window and door frames. Designed for efficiency and precision, it achieves a seamless, aesthetically superior finish that meets modern industry standards. Featuring individual control panels for each head, it allows operators to fine-tune welding parameters to ensure consistent, high-quality production across all cycles.

Technical Specifications

Model Number	SHZ4-120x4600
Welding Heads	4

Key Features

Primary Capabilities	Four-Head Simultaneous Welding, Seamless Finish, PVC Profile Processing, Individual Control
