

Four Post Lift for Wheel Alignment

This four-post lift is designed for wheel alignment services. It features integrated platforms for alignment equipment and a hydraulic system for smooth operation.

Overview

Professional Wheel Alignment Solution

This four-post lift is specifically engineered for precision wheel alignment services in professional automotive environments. Its robust construction ensures safe and reliable vehicle lifting, while the integrated platforms are designed to seamlessly accommodate alignment equipment. The hydraulic system provides smooth operation, complemented by essential safety locks for technician security and efficient vehicle positioning.

Key Features

Design Highlights

- Robust construction for safety
- Integrated alignment platforms
- Hydraulic lifting system
- Integrated safety locks

Primary Application

Wheel Alignment, Automotive Service, Vehicle Lifting
