

Four-Stroke Air-Cooled Engine for Scooters and Motorcycles

This four-stroke, air-cooled engine is designed for small vehicles such as scooters or motorcycles. It features a compact design, durable construction, and efficient fuel consumption.

Product Overview

High-Efficiency Air-Cooled Engine

This four-stroke, air-cooled engine is engineered for reliable performance in small vehicles like scooters and motorcycles. Its compact and durable construction ensures longevity while maintaining efficient fuel consumption. Designed as a lightweight power source, it is suitable for a variety of demanding automotive applications.

Technical Specifications

Engine Type	Four-stroke, air-cooled
Valve System	4 valves
Suitable Applications	Scooters, Motorcycles, Small Vehicles

Key Features

Performance Highlights

4 stroke
Stroke Cycle

4 valves
