

Four-Stroke Outboard Boat Engine

This four-stroke outboard engine is designed for marine propulsion on small to medium-sized boats. It features electronic fuel injection for fuel efficiency, a durable propeller, and a robust cooling system.

Overview

High-Performance Marine Propulsion

This four-stroke outboard engine is engineered for reliable marine propulsion, featuring a compact and lightweight design ideal for small to medium-sized vessels. It utilizes an advanced electronic fuel injection system to optimize fuel efficiency while significantly reducing emissions. With a user-friendly control system and robust cooling components, this engine ensures dependable performance and maneuverability across diverse marine environments.

Technical Specifications

Engine Type	Four-Stroke
Fuel System	Electronic Fuel Injection (EFI)

Performance Metrics

Rated Power

15 HP

Horsepower

Features

Key Features

- Compact and lightweight design
- Electronic fuel injection for efficiency
- Reduced emission output
- User-friendly control system
- Robust cooling system
- Durable propeller included

Design Highlights	Lightweight, Low Emission, Marine Grade, Easy Maneuverability
