Overview

High-Performance Four-Stroke Marine Propulsion

This range of four-stroke outboard engines is engineered for reliable marine propulsion, suitable for a variety of small boats and tenders. Designed for efficiency and smooth operation, these engines are ideal for recreational boating and fishing applications. The compact, lightweight design ensures easy handling and installation, while the tiller-steer configuration provides precise control on the water.

Technical Specifications

Engine Type	Four-Stroke
Horsepower Range	2.5HP to 60HP
Available Ratings	2.5 HP, 6 HP, 9.9 HP

Features

Key Features

- Compact and lightweight design
- Easy starting mechanism
- Smooth operational performance
- Fuel-efficient four-stroke technology
- Integrated propeller for efficient thrust

Primary Applications

Recreational Boating • Fishing • Tenders

Control System	Tiller Handle
