

Four-Tier Adjustable Metal Shelving Unit

This four-tier shelving unit is constructed from galvanized steel and particle board. It features adjustable shelf heights and a boltless assembly system, with each shelf supporting up to 175 kg.

Product Overview

Versatile Storage Solution

This four-tier metal shelving unit is designed for efficient organization in office storerooms, workshops, and utility spaces. Featuring adjustable shelf heights and a durable galvanized steel frame with E1 MDF boards, it provides a reliable storage solution for light-duty applications. The bolt-and-nut assembly system ensures structural integrity, making it a practical choice for professional storage environments.
