

# Four-Tine Metal Fork Head

This fork head features four tines and is constructed from durable metal. It is designed for lifting and turning loose materials in gardening and agricultural applications.

## Product Overview

### Professional Grade Fork Head

This four-tine metal fork head is engineered for durability and longevity in demanding agricultural and gardening environments. Designed specifically for lifting and turning loose materials like hay, straw, and leaves, it provides the robust performance required for heavy-duty tasks. The unit features a standard socket design, allowing for easy attachment to compatible handles (handle not included).

## Technical Specifications

### Key Features

- Durable metal construction
- Designed for lifting and turning
- Includes handle socket

Model Number	CFR001A
Number of Tines	4
Material	Metal
Primary Applications	Agriculture, Gardening, Material Handling
