Product Overview

Professional Electrical Distribution Enclosure

This four-unit distribution box is designed as a consumer control unit for the safe management and distribution of electrical energy. Engineered for reliability, it features a durable plastic construction that provides excellent insulation and corrosion resistance. Suitable for both residential and commercial premises, the unit supports versatile mounting options and ensures organized circuit protection.

Technical Specifications

IP Rating

IP30

Applicable Voltage	230V/415V
--------------------	-----------

Applicable Current	100 A
--------------------	-------

Rated Frequency	50/60Hz
-----------------	---------

Fire Resistance Capacity	650 /30s
--------------------------	----------

Design & Installation

Installation Type	Flush Mounted, Wall Mounted
-------------------	-----------------------------

Cover Opening Angle	180 degrees
---------------------	-------------

Capacity Configuration	4 pcs single pole MCB or 1 pcs 2 pole Main MCB + 2 pcs 1 pole MCB
------------------------	-------------------------------------------------------------------

Logistics & Packaging

Packaging Specifications

Capacity	Units per Carton	Dimensions (cm)
4 ways	20	52.5x34.0x39.0
