

Four-Way Hose Splitter

This four-way garden hose splitter is constructed from durable plastic. It allows for connecting up to four hoses to a single water source, with each outlet featuring a rotating valve for independent water flow control.

Overview

Versatile Four-Way Manifold

This four-way garden hose splitter is designed to streamline your irrigation setup by allowing up to four hoses to connect to a single water source. Constructed from durable, high-quality plastic, it offers reliable performance for various gardening and watering applications. Each of the four outlets is equipped with an individual shut-off valve, providing precise, independent control over water flow to different zones.

Technical Specifications

Number of Outlets	4
Material	Durable Plastic
Valve Control	Individual rotating shut-off valves

Features

Key Features

- Four-way manifold design
- Individual flow control per outlet
- Standard hose connection compatibility
- Durable construction for outdoor use

Applications	Gardening, Irrigation, Residential, Outdoor Maintenance
