

Four-Wheel Agricultural Tractor

This four-wheel tractor is designed for various farming operations. It is equipped with a cabin, heavy-duty tires, and a powerful engine.

Overview

High-Performance Agricultural Tractor

This four-wheel agricultural tractor is engineered for demanding farming operations, featuring a robust vertical water-cooled 4-stroke diesel engine. With a total displacement of 4400CC and 98.6 horsepower, it delivers strong power while maintaining low fuel consumption, vibration, and noise levels. The design prioritizes reliability and ease of maintenance, ensuring continuous productivity in the field.

Engine Specifications

Rated Power

98.6 hp
Horsepower

Engine Type	Vertical water-cooled 4-stroke 4-cylinder diesel
Total Displacement	4400 CC

Operational Features

Performance Highlights	Low Fuel Consumption, Low Vibration, Low Noise, High Reliability
------------------------	--

Maintenance

Maintenance Access	Fully opened engine hood for simple and convenient access
--------------------	---
