

Four-Wheel Drive Agricultural Tractor

This wheel tractor is a vital piece of agricultural machinery designed for a variety of tasks. Its sturdy construction and powerful engine make it suitable for plowing, tilling, and hauling agricultural materials.

Product Overview

Robust Agricultural Power

This four-wheel drive agricultural tractor is engineered for high performance in demanding field environments. Featuring a sturdy construction and reliable 4WD traction, it is an ideal solution for plowing, tilling, and heavy-duty hauling. The inclusion of an operator canopy ensures safety and comfort, making it a dependable asset for long work days across diverse terrains.

Technical Specifications

Drivetrain	4WD
Available Models	404, 454, 504

Features

Primary Advantages

- Enhanced traction through 4WD system
- Protective canopy for operator comfort
- High-grip tires for stability
- Versatile application for plowing and hauling
