Product Overview

Advanced Induction Cooking Technology

This four-zone induction cooktop utilizes half-bridge heating technology to provide rapid, efficient, and precise temperature control for professional-grade cooking. Designed with a sleek, durable micro-crystal glass panel, it offers a modern aesthetic that fits seamlessly into contemporary kitchen designs. The unit features smart power consumption management, intuitive touch controls, and comprehensive safety protections to ensure a safe and efficient culinary experience.

Technical Specifications

Heating Technology	Half-bridge induction heating
Minimum Power Output	100 W
Cooking Zones	4
Panel Material	Imported micro-crystal glass

Safety & Features

Control Interface

Touch sensor technology • LED digital display

Safety Features

Child lock, Residual temperature indication, No pan protection, Current monitoring, Voltage monitoring, Timer delay off

Performance

Performance Metrics
