

Four-Zone Induction Cooktop with Touch Controls

This induction cooktop features a sleek black glass surface with four independent cooking zones and touch-sensitive controls. It offers efficient and rapid heating, easy cleaning, and enhanced safety features compared to traditional cooktops.

Overview

Professional Induction Cooking Solution

This four-zone induction cooktop features a sophisticated black glass surface designed for modern commercial and professional kitchens. With precise touch-sensitive controls for each zone, it offers rapid heating capabilities and high efficiency compared to traditional cooking methods. The unit is engineered for seamless built-in installation, ensuring a sleek and space-saving integration into any workspace.
