

# Freestanding Dehumidifier for Indoor Air Quality

This dehumidifier is designed to control the damaging effects of excess humidity and improve room comfort. It is suitable for use in indoor swimming pools, museums, basements, and spas.

## Overview

### Professional Indoor Dehumidification

This freestanding dehumidifier is engineered to effectively control moisture levels and enhance indoor air quality in demanding environments such as swimming pools, museums, basements, and spas. Featuring a compact and modern design, the unit utilizes intelligent microcomputer control and a high-efficiency compressor to ensure optimal performance. It offers advanced operational features including automatic defrosting, continuous drainage capabilities, and a dynamic digital display.

## Technical Specifications

Refrigerant	R410a (CFC free)
Compressor Origin	Japanese brand
Coating	Anti-corrosive & hydrophilic coatings on Aluminum

## Features & Control

### Key Operational Features

- Auto-restart function
- Automatic defrosting
- Error code diagnostics
- Horizontal and vertical air swing
- Automatic air door closure

Control Interface	Digital LED display, Microcomputer control, Humidity display, Adjustable humidity control
Drainage	Continuous drainage with integrated water pump

## Design & Mobility

### Design Features

Compact • Freestanding • Front panel plastic design

Mobility	Yes
Optional Accessories	Remote controller
