

Freestanding Electric Patio Heater

This freestanding electric patio heater is designed for outdoor use. It features an infrared heating element and adjustable height for efficient and directional warmth.

Product Overview

Efficient Outdoor Heating Solution

This freestanding electric patio heater is designed to provide reliable and directional warmth for outdoor environments, featuring an efficient 1800W heating element with advanced gold coverguard technology. Built with user convenience in mind, it includes a wide-angle oscillation feature and a 3-meter heat radiation range to effectively warm your space. The unit is highly adjustable, offering both height and head angle modifications, and is equipped with essential safety features like overheat protection.
